JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 36, No. 6, November–December 1999

1999 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 926–930, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, page 931, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 932–936, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the ISBN number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1999, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Computational Simulation Improvements of Supersonic High-Angle-of-Attack Missile Flows **A99-005**
Numerical Study of Hypersonic Rarefied-Gas Flows About a Torus **A99-035**
Aerodynamics of the Mars Microprobe Entry Vehicles **A99-047**
Aerothermal Heating Predictions for Mars Microprobe **A99-049**
Aerodynamics of the Stardust Sample Return Capsule **A99-052**
Aerodynamics of a Spinning Cylinder in Rarefied Gas Flows **A99-059**
Engineering-, Intermediate-, and High-Level Aerodynamic Prediction Methods and Applications **A99-079**
High-Angle-of-Attack Aerodynamics of a Missile Geometry at Low Speed **A99-100**
Hypersonic Flowfield Analysis of X-33 Model with the Electric Discharge Method **A99-103**
Euler and Navier–Stokes Solutions for Missiles at High Angles of Attack **A99-111**

Aeroelasticity and Aeroservoelasticity

High-Supersonic/Hypersonic Flutter of Prismatic Composite Plate/Shell Panels **A99-097**

Aerospace Plane

Simple Analytical Model for Parametric Studies of Hypersonic Waveriders **A99-064**
Hypersonic Flowfield Analysis of X-33 Model with the Electric Discharge Method **A99-103**

Simulation

Automatic Landing Flight Experiment Flight Simulation Analysis and Flight Testing **A99-069**

Structural Materials

In Situ Erosion Study of Kapton® Using a Novel Hyperthermal Oxygen Atom Source **A99-007**

Testing, Flight and Ground

Plasma Electron Density Measurement Around Hypersonic Flight Experiment Vehicle **A99-072**
Hypersonic Flowfield Analysis of X-33 Model with the Electric Discharge Method **A99-103**

Energy

Rotating Machinery

Aerodynamics of a Spinning Cylinder in Rarefied Gas Flows **A99-059**

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

X-34 Experimental Aeroheating at Mach 6 and 10 **A99-021**
Engineering Aerothermal Analysis for X-34 Thermal Protection System Design **A99-026**
Three-Dimensional Shock/Boundary-Layer Interaction Between a Rocket and a Booster **A99-087**
Aerothermodynamic Analyses of Hypersonic, Blunt-Body Flows **A99-119**

Boundary Layers and Heat Transfer—Turbulent

Statistical Comparison of Computed Surface Pressure Predictions **A99-018**
Engineering Aerothermal Analysis for X-34 Thermal Protection System Design **A99-026**
Effects of Shock Wave Impingement on Supersonic Film Cooling **A99-077**

Boundary-Layer Stability and Transition

Flight Data for Boundary-Layer Transition at Hypersonic and Supersonic Speeds **A99-001**

Computational Fluid Dynamics

Erratum on "Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack" **A98-117**
Computational Aerothermodynamic Design Issues for Hypersonic Vehicles **A99-002**
Aerothermodynamic Environment for a Generic Missile **A99-003**
Statistical Comparison of Computed Surface Pressure Predictions **A99-018**
Numerical Investigation of Shock/Vortex Interaction in Hypersonic Thermochemical Nonequilibrium Flow **A99-028**
Base Flow Predictions for a Lightsat Launcher at Supersonic Speeds **A99-029**
Prediction and Validation of Mars Pathfinder Hypersonic Aerodynamic Database **A99-044**
Viscous Multiblock Simulations of Axisymmetric Launch Vehicle Flows **A99-060**
Plasma Electron Density Measurement Around Hypersonic Flight Experiment Vehicle **A99-072**
Asymmetric Divert Jet Performance of a Supersonic Missile: Computational and Experimental Comparisons **A99-080**
Transition Effects on Heating in the Wake of a Blunt Body **A99-085**
Analysis of Linear Aerospike Plume-Induced X-33 Base-Heating Environment **A99-102**
Euler and Navier–Stokes Solutions for Missiles at High Angles of Attack **A99-111**
Aerothermodynamic Analyses of Hypersonic, Blunt-Body Flows **A99-119**

Hypersonic Flow

Erratum on "Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack" **A98-117**

Analysis of Linear Aerospike Plume-Induced X-33 Base-Heating Environment **A99-102**
Euler and Navier–Stokes Solutions for Missiles at High Angles of Attack **A99-111**
Aerothermodynamic Analyses of Hypersonic, Blunt-Body Flows **A99-119**

Hypersonic Flow

Erratum on "Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack" **A98-117**

Flight Data for Boundary-Layer Transition at Hypersonic and Supersonic Speeds A99-001
Computational Aerothermodynamic Design Issues for Hypersonic Vehicles A99-002
X-34 Experimental Aeroheating at Mach 6 and 10 A99-021
Computational Aeroheating Predictions for X-34 A99-022
Heating Analysis of the Nosecap and Leading Edges of the X-34 Vehicle A99-024
Numerical Investigation of Shock/Vortex Interaction in Hypersonic Thermochemical Nonequilibrium Flow A99-028
Numerical Study of Hypersonic Rarefied-Gas Flows About a Torus A99-035
Mars Pathfinder Rarefied Aerodynamics: Computations and Measurements A99-040
Prediction and Validation of Mars Pathfinder Hypersonic Aerodynamic Database A99-044
Low-Density Aerodynamics of the Stardust Sample Return Capsule A99-053
Aerothermodynamics of the Stardust Sample Return Capsule A99-054
Optimal Artificially Blunted Leading-Edge Airfoils for Enhanced Aerothermodynamic Performance A99-061
Simple Analytical Model for Parametric Studies of Hypersonic Waveriders A99-064
Plasma Electron Density Measurement Around Hypersonic Flight Experiment Vehicle A99-072
Performance Study of a Power Law Starbody A99-082
Power Law Shapes for Leading-Edge Blunting with Minimal Shock Standoff A99-083
Three-Dimensional Shock/Boundary-Layer Interaction Between a Rocket and a Booster A99-087
Surface Heating Effects of X-33 Vehicle Thermal-Protection-System Panel Bowing A99-109
Aerothermodynamic Analyses of Hypersonic, Blunt-Body Flows A99-119

Inlet, Nozzle, Diffuser, and Channel Flows

Development of Pulsed Arc Heater for Small Hypersonic High-Enthalpy Wind Tunnel A99-091

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Base Flow Predictions for a Lightsat Launcher at Supersonic Speeds A99-029
Viscous Multiblock Simulations of Axisymmetric Launch Vehicle Flows A99-060
Low-Speed Aerodynamics of a Planetary Entry Capsule A99-084
Three-Dimensional Shock/Boundary-Layer Interaction Between a Rocket and a Booster A99-087
Utilization of Low-Speed Experiments in Transonic Capsule Stability Research A99-101

Plasmadynamics and MHD

Expansion of Multicharged Plasma Clouds into Ionospheric Plasma with Magnetic Field A99-118

Rarefied Flows

Numerical Study of Hypersonic Rarefied-Gas Flows About a Torus A99-035
Rarefied Aerothermodynamic Predictions for Mars Global Surveyor A99-038
Mars Pathfinder Rarefied Aerodynamics: Computations and Measurements A99-040
Direct Simulation Monte Carlo Calculations of Aerothermodynamics for Mars Microprobe Capsules A99-048
Low-Density Aerodynamics of the Stardust Sample Return Capsule A99-053
Aerodynamics of a Spinning Cylinder in Rarefied Gas Flows A99-059
Detailed Simulation of Surface Chemistry Leading to Spacecraft Glow A99-071
Analysis of Pressure Measurements During Cold-Gas Thruster Firings Onboard Suborbital Spacecraft A99-088

Shock Waves and Detonations

Performance Study of a Power Law Starbody A99-082
Power Law Shapes for Leading-Edge Blunting with Minimal Shock Standoff A99-083

Subsonic Flow

Reynolds Number Effects on Low-Speed Aerodynamics of a Hypersonic Configuration A99-031
Ceramics Catalysis Evaluation at High Temperature Using Thermal and Chemical Approaches A99-032

Supersonic Flow

Flight Data for Boundary-Layer Transition at Hypersonic and Supersonic Speeds A99-001

Transonic Flow

Computation of Roll Moment for Projectile with Wraparound Fins Using Euler Equation A99-004

Unsteady Flows

Numerical Investigation of Shock/Vortex Interaction in Hypersonic Thermochemical Nonequilibrium Flow A99-028
Low-Speed Aerodynamics of a Planetary Entry Capsule A99-084
Utilization of Low-Speed Experiments in Transonic Capsule Stability Research A99-101

Vortices

Computational Simulation Improvements of Supersonic High-Angle-of-Attack Missile Flows A99-005
Reynolds Number Effects on Low-Speed Aerodynamics of a Hypersonic Configuration A99-031

Guidance, Control, and Dynamics Technology

Astrodynamics

Application of Accelerometer Data to Mars Global Surveyor Aerobraking Operations A99-039
Navigation Flight Operations for Mars Pathfinder A99-041
Low-Thrust Trajectory Optimization Based on Epoch Eccentric Longitude Formulation A99-068

Computer Science

Direct Simulation Monte Carlo Calculations of Aerothermodynamics for Mars Microprobe Capsules A99-048
Automatic Landing Flight Experiment Flight Simulation Analysis and Flight Testing A99-069

Flight Mechanics

Low-Thrust Trajectory Optimization Based on Epoch Eccentric Longitude Formulation A99-068
Limit Cycle and Chaotic Behavior in Persistent Resonance of Unguided Missiles A99-112

Launch Vehicle Dynamics

Entry Dispersion Analysis for the Stardust Comet Sample Return Capsule A99-055
Elastic Response of Generic Space Vehicle Having Degraded Interstage Joints A99-058

Launch Vehicle Guidance and Control

Preliminary Static Aeroelastic Analysis of Reusable Launch Vehicle Stability and Control Derivatives A99-006

Missile Dynamics

Erratum on "Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack" A98-117
Angular Motion Effects on Kinetic Energy Projectile Performance A99-034
Limit Cycle and Chaotic Behavior in Persistent Resonance of Unguided Missiles A99-112

Missile Guidance and Control

Engineering-, Intermediate-, and High-Level Aerodynamic Prediction Methods and Applications A99-079

Navigation

Technology of Automated Rendezvous and Capture in Space A99-033
Navigation Flight Operations for Mars Pathfinder A99-041

Optimization Techniques

Multiple-Burn Families of Optimal Low- and Medium-Thrust Orbit Transfers A99-113

Spacecraft Dynamics

Nanometer Regularity in the Mechanics of a Precision Deployable Spacecraft Structure Joint A99-098
Inverse Simulation of Aeroassisted Orbit Plane Change of a Spacecraft A99-115

Spacecraft Guidance and Control

Analysis of Hubble Space Telescope Reaction Wheel Lubricant A99-013

Technology of Automated Rendezvous and Capture in Space A99-033
Multiple-Burn Families of Optimal Low- and Medium-Thrust Orbit Transfers A99-113
Inverse Simulation of Aeroassisted Orbit Plane Change of a Spacecraft A99-115
Measuring Attitude Rates Through Angular Momentum Gyros A99-121

Trajectory Optimization

Entry Dispersion Analysis for the Stardust Comet Sample Return Capsule A99-055
Low-Thrust Trajectory Optimization Based on Epoch Eccentric Longitude Formulation A99-068
Multiple-Burn Families of Optimal Low- and Medium-Thrust Orbit Transfers A99-113
Orbit Transfer with a Variable Thrust Hall Thruster Under Drag A99-114

Interdisciplinary Topics

Aerospace Management

Market-Based Approach for Manifesting Shuttle Secondary Payloads A99-017

Analytical and Numerical Methods

Grooves Effect on Lift: Data Correlation and Prediction for Kinetic Energy Projectiles A99-030
Radar and Optical Characterization of an Anomalous Orbital Debris Population A99-093
Surface Heating Effects of X-33 Vehicle Thermal-Protection-System Panel Bowing A99-109

Atmospheric and Space Sciences

Application of Accelerometer Data to Mars Global Surveyor Aerobraking Operations A99-039
Radar and Optical Characterization of an Anomalous Orbital Debris Population A99-093

Research Facilities and Instrumentation

Global Aeroheating Wind-Tunnel Measurements Using Improved Two-Color Phosphor Thermography Method A99-020
Development of Pulsed Arc Heater for Small Hypersonic High-Enthalpy Wind Tunnel A99-091

Safety

Quantifying and Reducing International Space Station Vulnerability Following Orbital Debris Penetration A99-016

Sensor Systems

Radar and Optical Characterization of an Anomalous Orbital Debris Population A99-093

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Aerothermodynamic Environment for a Generic Missile A99-003
Computation of Roll Moment for Projectile with Wraparound Fins Using Euler Equation A99-004
Study of Roll Stability Derivatives A99-019
X-34 Vehicle Aerodynamic Characteristics A99-027
Base Flow Predictions for a Lightsat Launcher at Supersonic Speeds A99-029
Grooves Effect on Lift: Data Correlation and Prediction for Kinetic Energy Projectiles A99-030
Reynolds Number Effects on Low-Speed Aerodynamics of a Hypersonic Configuration A99-031
Entry Dispersion Analysis for the Stardust Comet Sample Return Capsule A99-055
Viscous Multiblock Simulations of Axisymmetric Launch Vehicle Flows A99-060
Optimal Artificially Blunted Leading-Edge Airfoils for Enhanced Aerothermodynamic Performance A99-061
Asymmetric Divert Jet Performance of a Supersonic Missile: Computational and Experimental Comparisons A99-080
Application of the 1998 Version of the Aeroprediction Code A99-081
Euler and Navier–Stokes Solutions for Missiles at High Angles of Attack A99-111

Configuration Design

Study of Roll Stability Derivatives A99-019
Simple Analytical Model for Parametric Studies of Hypersonic Waveriders A99-064
Mini/Micro Shuttles with Hypergolic Noncryogenic Liquid Rocket Bipropellant A99-078
Application of the 1998 Version of the Aeroprediction Code A99-081
Performance Study of a Power Law Starbody A99-082

Launch Vehicle and Sounding Rocket Systems

Preliminary Static Aeroelastic Analysis of Reusable Launch Vehicle Stability and Control Derivatives A99-006
Mini/Micro Shuttles with Hypergolic Noncryogenic Liquid Rocket Bipropellant A99-078
Three-Stage Launch System with Scramjets A99-086
Two Options for Flight Testing Rocket-Based Combined-Cycle Engines A99-089
Liquid Propulsion Launch Vehicle Reliabiilty in Closed Form A99-090

Missile Systems

Asymmetric Divert Jet Performance of a Supersonic Missile: Computational and Experimental Comparisons A99-080
Application of the 1998 Version of the Aeroprediction Code A99-081
High-Angle-of-Attack Aerodynamics of a Missile Geometry at Low Speed A99-100
Solid Rocket Motor Development for Land-Based Intercontinental Ballistic Missiles A99-116

Propulsion and Propellant Systems

Postfire Short Circuit Phenomena of Electroexplosive Initiators A99-074
Solid Rocket Motor Development for Land-Based Intercontinental Ballistic Missiles A99-116

Simulation

Payload Fairing Separation Dynamics A99-063

Structural Design (Including Loads)

Probability of Structural Failure of a Satellite Launching Motor: A Case Study A99-011
Fracture Control of Space Flight Structures and Pressure Vessels A99-067

Subsystem Design and Ground Support

Postfire Short Circuit Phenomena of Electroexplosive Initiators A99-074

Testing, Flight and Ground

Aerothermodynamic Environment for a Generic Missile A99-003
Atmospheric Reentry Demonstrator Balloon Flight Test A99-062
Two Options for Flight Testing Rocket-Based Combined-Cycle Engines A99-089
Solid Rocket Motor Development for Land-Based Intercontinental Ballistic Missiles A99-116

Thermal Protection Systems

Computational Aeroheating Predictions for X-34 A99-022
Thermostructural Analysis of X-34 Wing Leading-Edge Tile Thermal Protection System A99-023
Analysis of Galileo Probe Heatshield Ablation and Temperature Data A99-036
Mars Pathfinder Entry Temperature Data, Aerothermal Heating, and Heatshield Material Response A99-046
Ablation and Thermal Response Program for Spacecraft Heatshield Analysis A99-057
Surface Heating Effects of X-33 Vehicle Thermal-Protection-System Panel Bowing A99-109

Propulsion

Ducted Rocket Engines

Two Options for Flight Testing Rocket-Based Combined-Cycle Engines A99-089

Electric and Advanced Space Propulsion

Orbit Transfer with a Variable Thrust Hall Thruster Under Drag A99-114

Ignition and Ignitor Design

Postfire Short Circuit Phenomena of Electroexplosive Initiators A99-074

Liquid Rocket Motors and Missile Systems

Liquid Propulsion Launch Vehicle Reliabiilty in Closed Form A99-090

Ramjets and Scramjets

Effects of Shock Wave Impingement on Supersonic Film Cooling A99-077

Solid Rocket Motors and Missile Systems

Probability of Structural Failure of a Satellite Launching Motor: A Case Study A99-011

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Mars Global Surveyor: Aerobraking Mission Overview A99-037
Rarefied Aerothermodynamic Predictions for Mars Global Surveyor A99-038
Mars Pathfinder Rarefied Aerodynamics: Computations and Measurements A99-040
Mars Polar Lander Aerothermodynamic and Entry Dispersion Analysis A99-051
Low-Density Aerodynamics of the Stardust Sample Return Capsule A99-053
Transition Effects on Heating in the Wake of a Blunt Body A99-085
Development of Pulsed Arc Heater for Small Hypersonic High-Enthalpy Wind Tunnel A99-091

Aerobraking Flight Mechanics

Mars Global Surveyor: Aerobraking Mission Overview A99-037
Application of Accelerometer Data to Mars Global Surveyor Aerobraking Operations A99-039
Mars Pathfinder Atmospheric Entry Navigation Operations A99-042
Mars Pathfinder Entry, Descent, and Landing Reconstruction A99-043
Mars Microprobe Entry-to-Impact Analysis A99-050
Mars Polar Lander Aerothermodynamic and Entry Dispersion Analysis A99-051

Landers

Mars Microprobe Entry-to-Impact Analysis A99-050

Mission Design and Analysis

Near-Polar Satellite Constellations for Continuous Global Coverage A99-010
Interplanetary Meteoroid Environment Model Update A99-015
Rarefied Aerothermodynamic Predictions for Mars Global Surveyor A99-038
Mars Pathfinder Atmospheric Entry Navigation Operations A99-042
Mars Pathfinder Entry, Descent, and Landing Reconstruction A99-043
Mars Microprobe Entry-to-Impact Analysis A99-050
Self-Assembling Transfer Vehicles for Human Mars Missions A99-076
Three-Stage Launch System with Scramjets A99-086

Mission Trajectories (Earth and Interplanetary)

Near-Polar Satellite Constellations for Continuous Global Coverage A99-010
Mars Global Surveyor: Aerobraking Mission Overview A99-037
Navigation Flight Operations for Mars Pathfinder A99-041
Mars Polar Lander Aerothermodynamic and Entry Dispersion Analysis A99-051
Orbit Transfer with a Variable Thrust Hall Thruster Under Drag A99-114

Space Experiments

Near Earth Asteroid Rendezvous (NEAR) Spacecraft Solar Conjunction Experiment A99-009
Interplanetary Meteoroid Environment Model Update A99-015
Analysis of Pressure Measurements During Cold-Gas Thruster Firings Onboard Suborbital Spacecraft A99-088
Analysis of Spacecraft Anomalies due to the Radiation Environment A99-117

Space Systems

Near-Polar Satellite Constellations for Continuous Global Coverage A99-010
Design Optimization of Phased-Array-Fed Reflector Antennas for Mobile Communication Satellites A99-012
Analysis of Hubble Space Telescope Reaction Wheel Lubricant A99-013
Direct Simulation of Space Debris Evolution A99-014
Quantifying and Reducing International Space Station Vulnerability Following Orbital Debris Penetration A99-016
Mars Pathfinder Entry, Descent, and Landing Reconstruction A99-043
Atmospheric Reentry Demonstrator Balloon Flight Test A99-062
Self-Assembling Transfer Vehicles for Human Mars Missions A99-076
Model-Based Thruster Leakage Monitor for the Cassini Spacecraft A99-096

Spacecraft Communication

Near Earth Asteroid Rendezvous (NEAR) Spacecraft Solar Conjunction Experiment A99-009
Design Optimization of Phased-Array-Fed Reflector Antennas for Mobile Communication Satellites A99-012
Paraboloidally Shaped Antenna Possessing Pointing and Beam-Width Control A99-095

Spacecraft Contamination/Sterilization

Particle Environment Surrounding the Midcourse Space Experiment Spacecraft A99-070

Spacecraft Data Sensing, Processing, and Transmission

Paraboloidally Shaped Antenna Possessing Pointing and Beam-Width Control A99-095

Spacecraft Propulsion System Integration

Self-Assembling Transfer Vehicles for Human Mars Missions A99-076

Spacecraft Radiation Protection

Analysis of Spacecraft Anomalies due to the Radiation Environment A99-117

Spacecraft Sensor Systems

Model-Based Thruster Leakage Monitor for the Cassini Spacecraft A99-096
Analysis of Spacecraft Anomalies due to the Radiation Environment A99-117
Measuring Attitude Rates Through Angular Momentum Gyros A99-121

Spacecraft Structural Configuration, Design, and Analysis

Comment on "Spacecraft Launch Depressurization Loads" A97-125
Reply to R. C. Mehta A97-125
Interplanetary Meteoroid Environment Model Update A99-015
Quantifying and Reducing International Space Station Vulnerability Following Orbital Debris Penetration A99-016
Fracture Control of Space Flight Structures and Pressure Vessels A99-067
Paraboloidally Shaped Antenna Possessing Pointing and Beam-Width Control A99-095
Model-Based Thruster Leakage Monitor for the Cassini Spacecraft A99-096

Spacecraft Test and Evaluation

Atmospheric Reentry Demonstrator Balloon Flight Test A99-062
Automatic Landing Flight Experiment Flight Simulation Analysis and Flight Testing A99-069
Electrical Breakdown of Anodized Coatings in Low-Density Plasmas A99-073
Low-Speed Aerodynamics of a Planetary Entry Capsule A99-084
Utilization of Low-Speed Experiments in Transonic Capsule Stability Research A99-101

Spacecraft Thermal Management

Flexible Heat Pipes for a Lightweight Spacecraft Radiator A99-092
Transient Thermal Sensitivity Analysis During Solar Eclipse with Discontinuous Heat Load A99-120

Structural Mechanics and Materials

Aeroelasticity and Control

Preliminary Static Aeroelastic Analysis of Reusable Launch Vehicle Stability and Control Derivatives A99-006
Aeroelastic Effects on the Roll Characteristics of a Wraparound Fin Projectile A99-065

Flexible and Active Structures

Friction Model of a Revolute Joint for a Precision Deployable Spacecraft Structure A99-075
Nanometer Regularity in the Mechanics of a Precision Deployable Spacecraft Structure Joint A99-098

Materials Structural Properties

In Situ Erosion Study of Kapton® Using a Novel Hyperthermal Oxygen Atom Source A99-007

Structural Design

Friction Model of a Revolute Joint for a Precision Deployable Spacecraft Structure A99-075

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Errata on "Influence of X-Ray Solar Flare Radiation on Degradation of Teflon® in Space" A97-081
In Situ Erosion Study of Kapton® Using a Novel Hyperthermal Oxygen Atom Source A99-007
Fracture Control of Space Flight Structures and Pressure Vessels A99-067

Structural Dynamics and Characterization

Elastic Response of Generic Space Vehicle Having Degraded Interstage Joints A99-058
Payload Fairing Separation Dynamics A99-063
Friction Model of a Revolute Joint for a Precision Deployable Spacecraft Structure A99-075
Nanometer Regularity in the Mechanics of a Precision Deployable Spacecraft Structure Joint A99-098
Submicron Mechanical Stability of a Prototype Deployable Space Telescope Support Structure A99-099

Structural Finite Elements

Nonlinear Behavior of the Space Shuttle Superlightweight Liquid-Oxygen Tank Under Prelaunch Loads A99-104
Modeling and Nonlinear Structural Analysis of a Large-Scale Launch Vehicle A99-105
Effects of Welding-Induced Imperfections on Behavior of Space Shuttle Superlightweight Tank A99-106
Nonlinear Behavior of Space Shuttle Superlightweight Tank Under Booster Ascent Loads A99-107
Nonlinear Behavior of Space Shuttle Superlightweight Tank Under End-of-Flight Loads A99-108

Structural Modeling

Probability of Structural Failure of a Satellite Launching Motor: A Case Study A99-011
Nonlinear Behavior of the Space Shuttle Superlightweight Liquid-Oxygen Tank Under Prelaunch Loads A99-104
Modeling and Nonlinear Structural Analysis of a Large-Scale Launch Vehicle A99-105
Effects of Welding-Induced Imperfections on Behavior of Space Shuttle Superlightweight Tank A99-106
Nonlinear Behavior of Space Shuttle Superlightweight Tank Under Booster Ascent Loads A99-107
Nonlinear Behavior of Space Shuttle Superlightweight Tank Under End-of-Flight Loads A99-108

Structural Stability

High-Supersonic/Hypersonic Flutter of Prismatic Composite Plate/Shell Panels A99-097
Nonlinear Behavior of the Space Shuttle Superlightweight Liquid-Oxygen Tank Under Prelaunch Loads A99-104
Modeling and Nonlinear Structural Analysis of a Large-Scale Launch Vehicle A99-105
Effects of Welding-Induced Imperfections on Behavior of Space Shuttle Superlightweight Tank A99-106
Nonlinear Behavior of Space Shuttle Superlightweight Tank Under Booster Ascent Loads A99-107
Nonlinear Behavior of Space Shuttle Superlightweight Tank Under End-of-Flight Loads A99-108

Thermal Effects

Ceramics Catalysis Evaluation at High Temperature Using Thermal and Chemical Approaches A99-032
Numerical Simulation of Metallic Thermal Protection System Panel Bowing A99-110

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Analysis of Galileo Probe Heatshield Ablation and Temperature Data A99-036
Mars Pathfinder Entry Temperature Data, Aerothermal Heating, and Heatshield Material Response A99-046
Aerothermodynamics of the Stardust Sample Return Capsule A99-054
Ablation and Thermal Response Program for Spacecraft Heatshield Analysis A99-057

Aerothermodynamics/Thermal Protection

Computational Aerothermodynamic Design Issues for Hypersonic Vehicles A99-002
Fabrication and Testing of Mo–Re Heat Pipes Embedded in Carbon/Carbon A99-008
Global Aeroheating Wind-Tunnel Measurements Using Improved Two-Color Phosphor Thermography Method A99-020
X-34 Experimental Aeroheating at Mach 6 and 10 A99-021
Computational Aeroheating Predictions for X-34 A99-022
Thermostructural Analysis of X-34 Wing Leading-Edge Tile Thermal Protection System A99-023
Heating Analysis of the Nosecap and Leading Edges of the X-34 Vehicle A99-024
Aeroheating Predictions for X-34 Using an Inviscid Boundary-Layer Method A99-025
Ceramics Catalysis Evaluation at High Temperature Using Thermal and Chemical Approaches A99-032
Analysis of Galileo Probe Heatshield Ablation and Temperature Data A99-036
Prediction and Validation of Mars Pathfinder Hypersonic Aerodynamic Database A99-044
Mars Pathfinder Entry Temperature Data, Aerothermal Heating, and Heatshield Material Response A99-046
Direct Simulation Monte Carlo Calculations of Aerothermodynamics for Mars Microprobe Capsules A99-048
Aerothermodynamics of the Stardust Sample Return Capsule A99-054
Ablation and Thermal Response Program for Spacecraft Heatshield Analysis A99-057
Power Law Shapes for Leading-Edge Blunting with Minimal Shock Standoff A99-083
Transition Effects on Heating in the Wake of a Blunt Body A99-085
Analysis of Linear Aerospike Plume-Induced X-33 Base-Heating Environment A99-102
Numerical Simulation of Metallic Thermal Protection System Panel Bowing A99-110
Fabrication and Testing of a Leading-Edge-Shaped Heat Pipe A99-122

Computational Heat Transfer

Analysis of Linear Aerospike Plume-Induced X-33 Base-Heating Environment A99-102

Heat Pipes

Fabrication and Testing of Mo–Re Heat Pipes Embedded in Carbon/Carbon A99-008
Flexible Heat Pipes for a Lightweight Spacecraft Radiator A99-092
Fabrication and Testing of a Leading-Edge-Shaped Heat Pipe A99-122

Nonintrusive Diagnostics

Global Aeroheating Wind-Tunnel Measurements Using Improved Two-Color Phosphor Thermography Method A99-020

Thermal Control

Errata on "Influence of X-Ray Solar Flare Radiation on Degradation of Teflon® in Space" A97-081

Thermal Modeling and Analysis

Characteristics of an Anomalous Orbital Debris Population Inferred from Theoretical Modeling A99-094
Numerical Simulation of Metallic Thermal Protection System Panel Bowing A99-110

Chronological Index

A97-081 **Influence of X-Ray Solar Flare Radiation on Degradation of Teflon® in Space.** Andrei Milintchouk, Marc Van Eesbeek, François Levadou, and Tim Harper, *European Space Agency, The Netherlands* (**34**, 4, p. 542) Article
Errata (**36**, 2, p. 296)

A97-125 **Spacecraft Launch Depressurization Loads.** Ángel Sanz-Andrés, Julián Santiago-Prowald, and Antonio Ayuso-Barea, *Universidad Politécnica de Madrid, Spain* (**34**, 6, p. 805) Article
Technical Comment by R. C. Mehta, *Vikram Sarabhai Space Centre, India* (**36**, 1, p. 152)
Reply (**36**, 1, p. 152)

A98-117 **Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack.** H. F. Nelson and Derek G. Hillstrom, *University of Missouri–Rolla* (**35**, 6, p. 749) Article based on AIAA Paper 98-0680
Errata (**36**, 6, p. 924)

A99-001 **Flight Data for Boundary-Layer Transition at Hypersonic and Supersonic Speeds.** Steven P. Schneider, *Purdue University* (**36**, 1, p. 8) Survey Paper

A99-002 **Computational Aerothermodynamic Design Issues for Hypersonic Vehicles.** Peter A. Gnoffo, K. James Weilmuenster, and H. Harris Hamilton II, *NASA Langley Research Center*; and David R. Olynick and Ethiraj Venkatapathy, *NASA Ames Research Center* (**36**, 1, p. 21) Survey Paper

A99-003 **Aerothermodynamic Environment for a Generic Missile.** Matthew E. Zuber, Matthew C. Towne, Alice J. Chen, John J. Bertin, and Robert J. Butler, *U.S. Air Force Academy* (**36**, 1, p. 44) Article

A99-004 **Computation of Roll Moment for Projectile with Wraparound Fins Using Euler Equation.** Seung-Kil Paek, Tae-Sang Park, Jae-Sung Bae, In Lee, and Jang Hyuk Kwon, *Korea Advanced Institute of Science and Technology* (**36**, 1, p. 53) Article

A99-005 **Computational Simulation Improvements of Supersonic High-Angle-of-Attack Missile Flows.** Eswar Josyula, *U.S. Air Force Research Laboratory* (**36**, 1, p. 59) Article based on AIAA Paper 98-0525

A99-006 **Preliminary Static Aeroelastic Analysis of Reusable Launch Vehicle Stability and Control Derivatives.** Thomas A. Zeiler, *University of Alabama*; and David McGhee and Joseph A. Brunty, *NASA Marshall Space Flight Center* (**36**, 1, p. 67) Article

A99-007 **In Situ Erosion Study of Kapton® Using a Novel Hyperthermal Oxygen Atom Source.** Eitan Grossman and Y. Lifshitz, *Soreq NRC, Israel*; and John T. Wolan, Charles K. Mount, and Gar B. Hoflund, *University of Florida* (**36**, 1, p. 75) Article

A99-008 **Fabrication and Testing of Mo–Re Heat Pipes Embedded in Carbon/Carbon.** David E. Glass, *Analytical Services and Materials, Inc.*; Charles J. Camarda, *NASA Johnson Space Center*; and Michael A. Merrigan and J. Tom Sena, *Los Alamos National Laboratory* (**36**, 1, p. 79) Article

A99-009 **Near Earth Asteroid Rendezvous (NEAR) Spacecraft Solar Conjunction Experiment.** Robert S. Bokulic, *Johns Hopkins University, Applied Physics Laboratory*; and William V. Moore, *Jet Propulsion Laboratory, California Institute of Technology* (**36**, 1, p. 87) Article

A99-010 **Near-Polar Satellite Constellations for Continuous Global Coverage.** Yuri Ulybyshev, *Rocket-Space Corporation "Energia," Russia* (**36**, 1, p. 92) Article
Errata (**36**, 4, p. 608)

A99-011 **Probability of Structural Failure of a Satellite Launching Motor: A Case Study.** Giora Maymon, *RAFAEL, Ministry of Defence, Israel* (**36**, 1, p. 100) Article

A99-012 **Design Optimization of Phased-Array-Fed Reflector Antennas for Mobile Communication Satellites.** Kyoko Tokunaga and Hiroaki Tsunoda, *Advanced Space Communications Research Laboratory, Japan*; and Hiroki Shoki and Minoru Okumura, *Toshiba Corporation, Japan* (**36**, 1, p. 105) Article based on AIAA Paper 98-1223 ISBN 1-56347-264-3

A99-013 **Analysis of Hubble Space Telescope Reaction Wheel Lubricant.** D. J. Carré and P. A. Bertrand, *The Aerospace Corporation* (**36**, 1, p. 109) Article

A99-014 **Direct Simulation of Space Debris Evolution.** Liqun Wang and John P. W. Stark, *University of London, England, UK* (**36**, 1, p. 114) Article

A99-015 **Interplanetary Meteoroid Environment Model Update.** Henry B. Garrett, *Jet Propulsion Laboratory, California Institute of Technology*; S. J. Drouilhet, *Moorhead State University*; John P. Oliver, *University of Florida*; and R. W. Evans, *OAO Corporation* (**36**, 1, p. 124) Article based on AIAA Paper 98-1049

A99-016 **Quantifying and Reducing International Space Station Vulnerability Following Orbital Debris Penetration.** Joel Williamsen, *NASA Marshall Space Flight Center*; and Kevin Blacklock, Hilary J. Evans, and Thomas D. Guy, *Sverdrup Technology, Inc.* (**36**, 1, p. 133) Article

A99-017 **Market-Based Approach for Manifesting Shuttle Secondary Payloads.** Randii R. Wessen, *Jet Propulsion Laboratory, California Institute of Technology*; and David Porter, *University of Arizona* (**36**, 1, p. 142) Article

A99-018 **Statistical Comparison of Computed Surface Pressure Predictions.** Malcolm S. Taylor and Walter B. Sturek, *U.S. Army Research Laboratory* (**36**, 1, p. 148) Engineering Note

A99-019 **Study of Roll Stability Derivatives.** Asher Sigal, *Technion—Israel Institute of Technology, Israel* (**36**, 1, p. 150) Engineering Note

A99-020 **Global Aeroheating Wind-Tunnel Measurements Using Improved Two-Color Phosphor Thermography Method.** N. Ronald Merski, *NASA Langley Research Center* (**36**, 2, p. 160) Article

A99-021 **X-34 Experimental Aeroheating at Mach 6 and 10.** Scott A. Berry, Thomas J. Horvath, Michael DiFulvio, Christopher Glass, and N. Ronald Merski, *NASA Langley Research Center* (**36**, 2, p. 171) Article

A99-022 **Computational Aeroheating Predictions for X-34.** William L. Kleb, William A. Wood, and Peter A. Gnoffo, *NASA Langley Research Center*; and Stephen J. Alter, *Lockheed Engineering and Sciences Company* (**36**, 2, p. 179) Article based on AIAA Paper 98-0879

A99-023 **Thermostructural Analysis of X-34 Wing Leading-Edge Tile Thermal Protection System.** Frank S. Milos and Thomas H. Squire, *NASA Ames Research Center* (**36**, 2, p. 189) Article

A99-024 **Heating Analysis of the Nosecap and Leading Edges of the X-34 Vehicle.** Grant Palmer, *NASA Ames Research Center*; and Susan Polsky, *Thermosciences Institute* (**36**, 2, p. 199) Article

A99-025 **Aeroheating Predictions for X-34 Using an Inviscid Boundary-Layer Method.** Christopher J. Riley and William L.

Kleb, *NASA Langley Research Center*; and Steven J. Alter, *Lockheed Engineering and Sciences Company* (**36**, 2, p. 206) Article

A99-026 Engineering Aerothermal Analysis for X-34 Thermal Protection System Design. Kathryn E. Wurster, Christopher J. Riley, and E. Vincent Zoby, *NASA Langley Research Center* (**36**, 2, p. 216) Article

A99-027 X-34 Vehicle Aerodynamic Characteristics. Gregory J. Brauckmann, *NASA Langley Research Center* (**36**, 2, p. 229) Article

A99-028 Numerical Investigation of Shock/Vortex Interaction in Hypersonic Thermochemical Nonequilibrium Flow. Satoru Yamamoto and Norinao Takasu, *Tohoku University, Japan*; and Hideo Nagatomo, *Osaka University, Japan* (**36**, 2, p. 240) Article

A99-029 Base Flow Predictions for a Lightsat Launcher at Supersonic Speeds. M. Serpico, A. Schettino, and A. Ciucci, *Centro Italiano Ricerche Aerospaziali, Italy*; and D. Falconi and M. Fabrizi, *Fiat Avio Comprensorio BPD, Italy* (**36**, 2, p. 247) Article

A99-030 Grooves Effect on Lift: Data Correlation and Prediction for Kinetic Energy Projectiles. Ameer G. Mikhail, *U.S. Army Research Laboratory* (**36**, 2, p. 255) Article based on AIAA Paper 98-0671

A99-031 Reynolds Number Effects on Low-Speed Aerodynamics of a Hypersonic Configuration. G. Neuwerth, U. Peiter, F. Decker, and D. Jacob, *Technical University of Aachen, Germany* (**36**, 2, p. 265) Article based on AIAA Paper 98-1578 ISBN 1-56347-266-X

A99-032 Ceramics Catalysis Evaluation at High Temperature Using Thermal and Chemical Approaches. M. J. H. Balat, M. Czerniak, and J. M. Badie, *Centre National de la Recherche Scientifique, France* (**36**, 2, p. 273) Article based on AIAA Paper 97-2589

A99-033 Technology of Automated Rendezvous and Capture in Space. Michael E. Polites, *NASA Marshall Space Flight Center* (**36**, 2, p. 280) Article

A99-034 Angular Motion Effects on Kinetic Energy Projectile Performance. Edward M. Schmidt, *U.S. Army Research Laboratory* (**36**, 2, p. 292) Engineering Note

A99-035 Numerical Study of Hypersonic Rarefied-Gas Flows About a Torus. Vladimir V. Riabov, *University of New Hampshire* (**36**, 2, p. 293) Engineering Note based on AIAA Paper 98-0778

A99-036 Analysis of Galileo Probe Heatshield Ablation and Temperature Data. F. S. Milos, Y.-K. Chen, and T. H. Squire, *NASA Ames Research Center*; and R. A. Brewer, *Lockheed Martin Missiles and Space Co.* (**36**, 3, p. 298) Article based on AIAA Paper 97-2480

A99-037 Mars Global Surveyor: Aerobraking Mission Overview. Daniel T. Lyons, Joseph G. Beerer, Pasquale Esposito, and M. Daniel Johnston, *Jet Propulsion Laboratory, California Institute of Technology*; and William H. Willcockson, *Lockheed Martin Astronautics* (**36**, 3, p. 307) Article

A99-038 Rarefied Aerothermodynamic Predictions for Mars Global Surveyor. R. G. Wilmoth, D. F. Rault, F. M. Cheatwood, and W. C. Engelund, *NASA Langley Research Center*; and R. W. Shane, *George Washington University* (**36**, 3, p. 314) Article

A99-039 Application of Accelerometer Data to Mars Global Surveyor Aerobraking Operations. R. H. Tolson, G. M. Keating, G. J. Cancro, J. S. Parker, S. N. Noll, and B. L. Wilkerson, *George Washington University and NASA Langley Research Center* (**36**, 3, p. 323) Article

A99-040 Mars Pathfinder Rarefied Aerodynamics: Computations and Measurements. James N. Moss, Robert C. Blanchard, Richard C. Wilmoth, and Robert D. Braun, *NASA Langley Research Center* (**36**, 3, p. 330) Article based on AIAA Paper 98-0298

A99-041 Navigation Flight Operations for Mars Pathfinder. Robin M. Vaughan, Pieter H. Kallemeyn Jr., and David A. Spencer, *Jet Propulsion Laboratory, California Institute of Technology*; and Robert D. Braun, *NASA Langley Research Center* (**36**, 3, p. 340) Article

A99-042 Mars Pathfinder Atmospheric Entry Navigation Operations. R. D. Braun, *NASA Langley Research Center*; and D. A. Spencer, P. H. Kallemeyn, and R. M. Vaughan, *Jet Propulsion Laboratory, California Institute of Technology* (**36**, 3, p. 348) Article based on AIAA Paper 97-3663 ISBN 1-56347-235-X

A99-043 Mars Pathfinder Entry, Descent, and Landing Reconstruction. David A. Spencer, *Jet Propulsion Laboratory, California Institute of Technology*; Robert C. Blanchard and Robert D. Braun, *NASA Langley Research Center*; and Pieter H. Kallemeyn and Sam W. Thurman, *Jet Propulsion Laboratory, California Institute of Technology* (**36**, 3, p. 357) Article

A99-044 Prediction and Validation of Mars Pathfinder Hypersonic Aerodynamic Database. Peter A. Gnoffo, Robert D. Braun, K. James Weilmuenster, Robert A. Mitcheltree, Walter C. Engelund, and Richard W. Powell, *NASA Langley Research Center* (**36**, 3, p. 367) Article based on AIAA Paper 98-2445

A99-045 Mars Pathfinder Heatshield Design and Flight Experience. William H. Willcockson, *Lockheed Martin Astronautics* (**36**, 3, p. 374) Article

A99-046 Mars Pathfinder Entry Temperature Data, Aerothermal Heating, and Heatshield Material Response. Frank S. Milos, and Y.-K. Chen, *NASA Ames Research Center*; William M. Congdon, *Applied Research Associates, Inc.*; and Janine M. Thornton, *Lockheed Martin Astronautics* (**36**, 3, p. 380) Article based on AIAA Paper 98-2681

A99-047 Aerodynamics of the Mars Microprobe Entry Vehicles. R. A. Mitcheltree, J. N. Moss, F. M. Cheatwood, F. A. Greene, and R. D. Braun, *NASA Langley Research Center* (**36**, 3, p. 392) Article based on AIAA Paper 97-3658 ISBN 1-56347-235-X

A99-048 Direct Simulation Monte Carlo Calculations of Aerothermodynamics for Mars Microprobe Capsules. James N. Moss, Richard G. Wilmoth, and Joseph M. Price, *NASA Langley Research Center*; (**36**, 3, p. 399) Article

A99-049 Aerothermal Heating Predictions for Mars Microprobe. R. A. Mitcheltree, M. DiFulvio, T. J. Horvath, and R. D. Braun, *NASA Langley Research Center* (**36**, 3, p. 405) Article based on AIAA Paper 98-0170

A99-050 Mars Microprobe Entry-to-Impact Analysis. Robert D. Braun, Robert A. Mitcheltree, and F. McNeil Cheatwood, *NASA Langley Research Center* (**36**, 3, p. 412) Article

A99-051 Mars Polar Lander Aerothermodynamic and Entry Dispersion Analysis. Eric M. Queen, F. McNeil Cheatwood, Richard W. Powell, and Robert D. Braun, *NASA Langley Research Center*; and C. Thomas Edquist, *Lockheed Martin Astronautics* (**36**, 3, p. 421) Article

A99-052 Aerodynamics of the Stardust Sample Return Capsule. R. A. Mitcheltree, R. G. Wilmoth, F. M. Cheatwood, G. J. Brauckmann, and F. A. Greene, *NASA Langley Research Center* (**36**, 3, p. 429) Article based on AIAA Paper 97-2304 ISBN 1-56347-232-5

A99-053 Low-Density Aerodynamics of the Stardust Sample Return Capsule. Richard G. Wilmoth, Robert A. Mitcheltree, and

James N. Moss, *NASA Langley Research Center* (**36**, 3, p. 436) Article based on AIAA Paper 97-2510

A99-054 Aerothermodynamics of the Stardust Sample Return Capsule. Dave Olynick, Y.-K. Chen, and Michael E. Tauber, *NASA Ames Research Center* (**36**, 3, p. 442) Article based on AIAA Paper 98-0167

A99-055 Entry Dispersion Analysis for the Stardust Comet Sample Return Capsule. Prasun N. Desai, Robert A. Mitcheltree, and F. McNeil Cheatwood, *NASA Langley Research Center* (**36**, 3, p. 463) Article based on AIAA Paper 97-3812 ISBN 1-56347-235-X

A99-056 Stardust Sample Return Capsule Design Experience. William H. Willcockson, *Lockheed Martin Aeronautics* (**36**, 3, p. 470) Article based on AIAA Paper 98-2854

A99-057 Ablation and Thermal Response Program for Spacecraft Heatshield Analysis. Y.-K. Chen and Frank S. Milos, *NASA Ames Research Center* (**36**, 3, p. 475) Article based on AIAA Paper 98-0273

A99-058 Elastic Response of Generic Space Vehicle Having Degraded Interstage Joints. A. Joshi, *Indian Institute of Technology, India* (**36**, 3, p. 484) Engineering Note

A99-059 Aerodynamics of a Spinning Cylinder in Rarefied Gas Flows. Vladimir V. Riabov, *University of New Hampshire* (**36**, 3, p. 486) Engineering Note

A99-060 Viscous Multiblock Simulations of Axisymmetric Launch Vehicle Flows. João L. F. Azevedo, *Instituto de Aeronáutica e Espaço, Brazil*; Daniel Strauss, *Instituto Tecnológico de Aeronáutica, Brazil*; and Marcello A. S. Ferrari, *Instituto de Aeronáutica e Espaço, Brazil* (**36**, 4, p. 489) Article

A99-061 Optimal Artificially Blunted Leading-Edge Airfoils for Enhanced Aerothermodynamic Performance. Anurag Gupta and Stephen M. Ruffin, *Georgia Institute of Technology* (**36**, 4, p. 499) Article

A99-062 Atmospheric Reentry Demonstrator Balloon Flight Test. Maurizio De Giorgis, Giorgio Borriello, Andrea Allasio, and Raffaele Vavala, *Alenia, Italy*; Thierry Leveugle, *Aerospatiale, France*; and Orazio Cosentino, *Italian Space Agency* (**36**, 4, p. 507) Article

A99-063 Payload Fairing Separation Dynamics. S-C. Cheng, *The Aerospace Corporation* (**36**, 4, p. 511) Article

A99-064 Simple Analytical Model for Parametric Studies of Hypersonic Waveriders. Ryan P. Starkey and Mark J. Lewis, *University of Maryland* (**36**, 4, p. 516) Article

A99-065 Aeroelastic Effects on the Roll Characteristics of a Wraparound Fin Projectile. Seung-Kil Paek and In Lee, *Korea Advanced Institute of Science and Technology* (**36**, 4, p. 524) Article

A99-066 Forces for Rolling and Asymmetric Pinching of Pressurized Cylindrical Tubes. J. P. Fay and C. R. Steele, *Stanford University* (**36**, 4, p. 531) Article

A99-067 Fracture Control of Space Flight Structures and Pressure Vessels. S. Sutharshana, *Angeles Crest Engineering, Inc.*; J. B. Chang, *The Aerospace Corporation*; and M. C. Lou, *Jet Propulsion Laboratory, California Institute of Technology* (**36**, 4, p. 538) Article

A99-068 Low-Thrust Trajectory Optimization Based on Epoch Eccentric Longitude Formulation. Jean Albert Kechichian, *The Aerospace Corporation* (**36**, 4, p. 543) Article

A99-069 Automatic Landing Flight Experiment Flight Simulation Analysis and Flight Testing. Toshikazu Motoda, Yoshikazu Miyazawa, and Kazutoshi Ishikawa, *National Aerospace Laboratory, Japan*; and Tatsushi Izumi, *National Space Development Agency, Japan* (**36**, 4, p. 554) Article

A99-070 Particle Environment Surrounding the Midcourse Space Experiment Spacecraft. Gary E. Galica, B. David Green, and Mark T. Boies, *Physical Sciences, Inc.*; and O. Manuel Uy, David M. Silver, and Richard C. Benson, *Johns Hopkins University, Applied Physics Laboratory* (**36**, 4, p. 561) Article

A99-071 Detailed Simulation of Surface Chemistry Leading to Spacecraft Glow. Daniel P. Karipides and Iain D. Boyd, *Cornell University*; and George E. Caledonia, *Physical Sciences, Inc.* (**36**, 4, p. 566) Article

A99-072 Plasma Electron Density Measurement Around Hypersonic Flight Experiment Vehicle. Takeshi Ito and Ryoji Takaki, *National Aerospace Laboratory, Japan*; and Ken Teraoka, *National Space Development Agency, Japan* (**36**, 4, p. 573) Article based on AIAA Paper 98-2480

A99-073 Electrical Breakdown of Anodized Coatings in Low-Density Plasmas. J. T. Galofaro, *NASA Lewis Research Center*; C. V. Doreswamy, *Tuskegee University*; B. V. Vayner, *Ohio Aerospace Institute*; and D. B. Snyder and D. C. Ferguson, *NASA Lewis Research Center* (**36**, 4, p. 579) Article

A99-074 Postfire Short Circuit Phenomena of Electroexplosive Initiators. Lien C. Yang, *TRW Systems & Information Technology Group* (**36**, 4, p. 586) Article

A99-075 Friction Model of a Revolute Joint for a Precision Deployable Spacecraft Structure. M. Roman Hachkowski, *Raytheon Optical Systems*; Lee D. Peterson, *University of Colorado*; and Mark S. Lake, *NASA Langley Research Center* (**36**, 4, p. 591) Article based on AIAA Paper 96-1472 ISBN 1-56347-209-0

A99-076 Self-Assembling Transfer Vehicles for Human Mars Missions. Benjamin Donahue, *Boeing Space Systems* (**36**, 4, p. 599) Engineering Note based on AIAA Paper 94-2761

A99-077 Effects of Shock Wave Impingement on Supersonic Film Cooling. Kenichi Takita and Goro Masuya, *Tohoku University, Japan* (**36**, 4, p. 602) Engineering Note

A99-078 Mini/Micro Shuttles with Hypergolic Noncryogenic Liquid Rocket Bipropellant. Frederick W. Boltz, *NASA Ames Research Center* (**36**, 4, p. 605) Engineering Note

A99-079 Engineering-, Intermediate-, and High-Level Aerodynamic Prediction Methods and Applications. Marnix F. E. Dillenius, Daniel J. Lesieutre, Martin C. Hegedus, Stanley C. Perkins Jr., John F. Love, and Teresa O. Lesieutre, *Nielsen Engineering and Research, Inc.* (**36**, 5, p. 609) Survey Paper

A99-080 Asymmetric Divert Jet Performance of a Supersonic Missile: Computational and Experimental Comparisons. B. Srivastava, *Raytheon Company* (**36**, 5, p. 621) Article

A99-081 Application of the 1998 Version of the Aeroprediction Code . F. G. Moore, R. M. McInville, and T. C. Hymer, *U.S. Naval Surface Warfare Center* (**36**, 5, p. 633) Article

A99-082 Performance Study of a Power Law Starbody. John W. Sabean and Mark J. Lewis, *University of Maryland*; and David Mee and Allan Paull, *University of Queensland, Australia* (**36**, 5, p. 646) Article

A99-083 Power Law Shapes for Leading-Edge Blunting with Minimal Shock Standoff. Timothy F. O'Brien and Mark J. Lewis, *University of Maryland* (**36**, 5, p. 653) Article

A99-084 Low-Speed Aerodynamics of a Planetary Entry Capsule. Frank Y. Wang, Özgür Karatekin, and Jean-Marc Charbonnier, *von Kármán Institute for Fluid Dynamics, Belgium* (**36**, 5, p. 659) Article

A99-085 Transition Effects on Heating in the Wake of a Blunt Body. Brian R. Hollis, *NASA Langley Research Center*; and John N. Perkins, *North Carolina State University* (**36**, 5, p. 668) Article

A99-086 Three-Stage Launch System with Scramjets. Toshiyuki Kimura and Keisuke Sawada, *Tohoku University, Japan* (**36**, 5, p. 675) Article based on AIAA Paper 98-0303

A99-087 Three-Dimensional Shock/Boundary-Layer Interaction Between a Rocket and a Booster. Yoshiharu Tanahashi, Tsuyoshi Ohara, and Yoshiaki Nakamura, *Nagoya University, Japan* (**36**, 5, p. 681) Article based on AIAA Paper 97-2572

A99-088 Analysis of Pressure Measurements During Cold-Gas Thruster Firings Onboard Suborbital Spacecraft. Nikos A. Gatsonis, *Worcester Polytechnic Institute*; and R. E. Erlandson, P. K. Swaminathan, and C. K. Kumar, *Johns Hopkins University, Applied Physics Laboratory* (**36**, 5, p. 688) Article

A99-089 Two Options for Flight Testing Rocket-Based Combined-Cycle Engines. John R. Olds, *Georgia Institute of Technology* (**36**, 5, p. 693) Article based on AIAA Paper 96-2688

A99-090 Liquid Propulsion Launch Vehicle Reliabiilty in Closed Form. Zhaofeng Huang and Theodore F. Weber Jr., *The Boeing Company* (**36**, 5, p. 701) Article

A99-091 Development of Pulsed Arc Heater for Small Hypersonic High-Enthalpy Wind Tunnel. Leonardo Biagioni and Fabrizio Scortecci, *Centrospazio–CPR, Italy*; and Fabrizio Paganucci, *University of Pisa, Italy* (**36**, 5, p. 704) Article based on AIAA Paper 97-3016

A99-092 Flexible Heat Pipes for a Lightweight Spacecraft Radiator. David E. Glass, Jonathan C. Stevens, and V. V. Raman, *Analytical Services and Materials, Inc.* (**36**, 5, p. 711) Article

A99-093 Radar and Optical Characterization of an Anomalous Orbital Debris Population. R. Sridharan, W. Beavers, E. M. Gaposchkin, R. Lambour, and J. Kansky, *Lincoln Laboratory, Massachusetts Institute of Technology*; and E. Stansbery, *NASA Johnson Space Center* (**36**, 5, p. 719) Article

A99-094 Characteristics of an Anomalous Orbital Debris Population Inferred from Theoretical Modeling. R. Lambour and R. Sridharan, *Lincoln Laboratory, Massachusetts Institute of Technology* (**36**, 5, p. 726) Article

A99-095 Paraboloidally Shaped Antenna Possessing Pointing and Beam-Width Control. Robert J. Stanley and Larry M. Silverberg, *North Carolina State University* (**36**, 5, p. 736) Article

A99-096 Model-Based Thruster Leakage Monitor for the Cassini Spacecraft. Allan Y. Lee, *Jet Propulsion Laboratory, California Institute of Technology* (**36**, 5, p. 745) Article

A99-097 High-Supersonic/Hypersonic Flutter of Prismatic Composite Plate/Shell Panels. S. Wang, *Loughborough University, England, UK* (**36**, 5, p. 750) Article

A99-098 Nanometer Regularity in the Mechanics of a Precision Deployable Spacecraft Structure Joint. Steven J. Bullock, *Hughes Space and Communications*; and Lee D. Peterson, *University of Colorado* (**36**, 5, p. 758) Article based on AIAA Paper 96-1333 ISBN 1-56347-209-0

A99-099 Submicron Mechanical Stability of a Prototype Deployable Space Telescope Support Structure. Peter A. Warren, *Foster–Miller, Inc.*; and Lee D. Peterson and Jason D. Hinkle, *University of Colorado* (**36**, 5, p. 765) Article

A99-100 High-Angle-of-Attack Aerodynamics of a Missile Geometry at Low Speed. D. Maynes, *Brigham Young University*; and G. A. Gebert, *Sverdrup Technology, Inc.* (**36**, 5, p. 772) Engineering Note

A99-101 Utilization of Low-Speed Experiments in Transonic Capsule Stability Research. Frank Y. Wang, Jean-Marc Charbonnier, Özgür Karatekin, and Sebastien Paris, *von Kármán Institute for Fluid Dynamics, Belgium* (**36**, 5, p. 774) Engineering Note

A99-102 Analysis of Linear Aerospike Plume-Induced X-33 Base-Heating Environment. Ten-See Wang, *NASA Marshall Space Flight Center* (**36**, 6, p. 777) Article based on AIAA Paper 98-2469.

A99-103 Hypersonic Flowfield Analysis of X-33 Model with the Electric Discharge Method. Masatomi Nishio and Takanori Hagiwara, *Fukuyama University, Japan* (**36**, 6, p. 784) Engineering Note

A99-104 Nonlinear Behavior of the Space Shuttle Superlightweight Liquid-Oxygen Tank Under Prelaunch Loads. Michael P. Nemeth, Vicki O. Britt, Richard D. Young, Timothy J. Collins, and James H. Starnes Jr., *NASA Langley Research Center* (**36**, 6, p. 788) Article

A99-105 Modeling and Nonlinear Structural Analysis of a Large-Scale Launch Vehicle. Richard D. Young, *Lockheed Martin Engineering and Sciences Services*; and Charles C. Rankin, *Lockheed Martin Missiles and Space Company* (**36**, 6, p. 804) Article

A99-106 Effects of Welding-Induced Imperfections on Behavior of Space Shuttle Superlightweight Tank. Michael P. Nemeth, Richard D. Young, Timothy J. Collins, and James H. Starnes Jr., *NASA Langley Research Center* (**36**, 6, p. 812) Article

A99-107 Nonlinear Behavior of Space Shuttle Superlightweight Tank Under Booster Ascent Loads. Richard D. Young, Michael P. Nemeth, Timothy J. Collins, and James H. Stearns Jr., *NASA Langley Research Center* (**36**, 6, p. 820) Article

A99-108 Nonlinear Behavior of Space Shuttle Superlightweight Tank Under End-of-Flight Loads. Michael P. Nemeth, Richard D. Young, Timothy J. Collins, and James H. Starnes Jr., *NASA Langley Research Center* (**36**, 6, p. 828) Article

A99-109 Surface Heating Effects of X-33 Vehicle Thermal-Protection-System Panel Bowing. Grant Palmer, *NASA Ames Research Center*; Dean Kontinos, *Thermosciences Institute*; and Brian Sherman, *BF Goodrich Company* (**36**, 6, p. 836) Article based on AIAA Paper 98-0865

A99-110 Numerical Simulation of Metallic Thermal Protection System Panel Bowing. Dean A. Kontinos and Grant Palmer, *NASA Ames Research Center* (**36**, 6, p. 842) Article based on AIAA Paper 98-0866

A99-111 Euler and Navier–Stokes Solutions for Missiles at High Angles of Attack. E. Oktay, N. Alemdaroğlu, and E. Tarhan, *ROKETSAN, Missiles Industries, Inc., Turkey*; and P. Champigny and P. d'Espiney, *ONERA, France* (**36**, 6, p. 850) Article

A99-112 Limit Cycle and Chaotic Behavior in Persistent Resonance of Unguided Missiles. Ömer Tanrıkulu, *TÜBİTAK-SAGE, Turkey* (**36**, 6, p. 859) Article based on AIAA Paper 97-3491 ISBN 1-56347-234-1

A99-113 Multiple-Burn Families of Optimal Low- and Medium-Thrust Orbit Transfers. Jason C. H. Chuang, *Lockheed Martin Vought Systems Corporation*; Troy D. Goodson, *Jet Propulsion Laboratory, California Institute of Technology*; and John Hanson, *NASA Marshall Space Flight Center* (**36**, 6, p. 866) Article

A99-114 Orbit Transfer with a Variable Thrust Hall Thruster Under Drag. Y. Raitses, *Princeton University*; M. Guelman, *Technion—Israel Institute of Technology*; and J. Ashkenazy and G. Appelbaum, *Soreq Nuclear Research Center, Israel* (**36**, 6, p. 875) Article based on AIAA Paper 98-3487

A99-115 **Inverse Simulation of Aeroassisted Orbit Plane Change of a Spacecraft.** Nicola de Divitiis, *University of Rome "La Sapienza," Italy* (**36**, 6, p. 882) Article

A99-116 **Solid Rocket Motor Development for Land-Based Intercontinental Ballistic Missiles.** W. S. Kennedy, S. M. Kovacic, E. C. Rea, and T. C. Lin, *TRW, Inc.* (**36**, 6, p. 890) Article

A99-117 **Analysis of Spacecraft Anomalies due to the Radiation Environment.** M. Lauriente, *NASA Goddard Space Flight Center*; A. L. Vampola, *University Research Foundation*; and R. Koga and R. Hosken, *The Aerospace Corporation* (**36**, 6, p. 902) Article based on AIAA Paper 98-1048

A99-118 **Expansion of Multicharged Plasma Clouds into Ionospheric Plasma with Magnetic Field.** Sergey T. Surzhikov, *Russian Academy of Sciences* (**36**, 6, p. 907) Article

A99-119 **Aerothermodynamic Analyses of Hypersonic, Blunt-Body Flows.** Henry A. Carlson, *Raytheon Missile Systems Company* (**36**, 6, p. 912) Engineering Note

A99-120 **Transient Thermal Sensitivity Analysis During Solar Eclipse with Discontinuous Heat Load.** S. Suresha, *Indian Space Research Organisation Satellite Centre*; and S. C. Gupta, *Indian Institute of Science* (**36**, 6, p. 916) Engineering Note

A99-121 **Measuring Attitude Rates Through Angular Momentum Gyros.** Hong-Hua Zhang, *Beijing Institute of Control Engineering, PRC* (**36**, 6, p. 919) Engineering Note

A99-122 **Fabrication and Testing of a Leading-Edge-Shaped Heat Pipe.** David E. Glass, *Analytical Services and Materials, Inc.*; Charles J. Camarda, *NASA Johnson Space Center*; and Michael A. Merrigan, J. Tom Sena, and Robert S. Reid, *Los Alamos National Laboratory* (**36**, 6, p. 921) Engineering Note
